YEMCONOMY

Pre-Poll STATEMENTS overview and descriptions. All links.

To vote, simply click on the respective link and then choose PRO or NO.

Please participate wherever possible. Influence only can happen if the YEM owners take action in a significant number.

Should the yemexchange.com site be discontinued without replacement?

The YEM Foundation's own sales page competes with the exchange, on which YEM holders offer their YEM for sale. This competitive situation creates great frustration among YEM owners and discourages potential investors and businesses from joining the economy. Anyone who wants to buy YEM must be referred exclusively to digitalexchange.center.

The YEM Foundation can use the private order function there for your purposes. The current yemexchange.com must be switched off permanently without replacement. It is a relic from the early days of YEM and has long been redundant and harmful to liquidity on digitalexchange.center.

Should USDD be canceled without replacement?

Purchasing USDD is currently required to purchase YEM on DEC. This represents an unnecessary hurdle for potential investors. In order to accelerate liquidity, the purchase of YEM must be made as smooth as possible.

The YEM Foundation runs an official blog!

In order to promote YEM's reputation, controlled and regular communication with the public (public relations) is of central importance. For this purpose, consistently recognizable articles must be distributed on social media platforms.

Those articles are based on a blog with the official branding of the YEM Foundation. Articles can be published by authorized authors and by the YF itself and rated, commented on and distributed by the community with just a few clicks. This ensures that only those links/articles that come from this blog are official. This not only ensures better information, but also prevents fake news. In addition, the image of a lively community emerges.

Should a buyback program be started for all YEM holders?

Promoting professional YEM sellers with fiat commissions ensures a solid financial basis for the YEM Foundation, which can serve as the basis for all other paid measures. In particular, regular, smaller buybacks can be made on DEC, which results in an immediate increase in the mood and reputation of YEM. This measure is a first step towards 100% organic liquidity and sends a signal of

hope and confidence to all YEM holders, potential investors and business people who want to join YEMCONOMY. YEM could be distributed through an independent company that runs the buyback program authorized by the YEM Foundation.

Should the YEM Foundation regularly report on its planned goals and results?

In order to create a transparent and therefore trustworthy image of the YEM Foundation, it is imperative that the goals and planned measures of the YEM Foundation are published at regular intervals. The report on the results of the announced goals is just as important. Publications can be made in quarters. These reports form the information and evaluation basis for the YEM Foundation's electorate.

Should PernumPay's interfaces be optimized?

For use in popular shop apps, it is necessary that a professional interface is available that takes inventory, partial payments, etc. into account. The easier it is to integrate and use this API, the faster retailers and service providers will join the YEM marketplace.

Vote here: <https://proorno.com/statement.php?id=19749>

Should PernumPay also be available for P2P?

A simple way to send money for private purposes makes it easier to get started in the YEM world.

Vote here: <https://proorno.com/statement.php?id=19750>

Should the listing of additional coins on YEMCHAIN be accelerated?

The listing of various trading pairs increases entry into the YEM Economy through easy exchange. The more coins are traded on YEMCHAIN, the higher the liquidity of YEM.

Vote here: <https://proorno.com/statement.php?id=19751>

Should the YEM Foundation hold weekly online events?

In order to ensure regular training and further education on the topic of YEM, the YEM Foundation organizes short and precise online events. These can be presentations and special trainings. A social media training with a focus on WUB and the blog increases awareness of a controlled public appearance of the entire YEM community and prevents fake news.

Vote here: <https://proorno.com/statement.php?id=19752>

Should the YEM Economy websites be designed multilingually?

In order to ensure the broadest possible range of information and to make it easier to use the various services and websites, it is essential to address users in their native language. At least the 10 most spoken languages in the world should therefore be available on every YEM Economy website and service (e.g. YEMChain, PernumPay, YEM Foundation homepage, YEM Supportes Club etc.).

Vote here: <https://proorno.com/statement.php?id=19757>

Should services that promote the YEM economy receive more support?

Liquidity arises from the diverse possible uses of a currency. In order to enable as many business owners as possible to get started and take their first steps in the YEM Economy, targeted support and the development of trained consultants is necessary. One project that invests in this activity is the SHOPPING COMPASS, which also serves as a central search engine for offers with YEM Payment at all levels.

Furthermore, the SHOPPING COMPASS offers a professional marketing service with the help of which YEM in general, as well as the development of professional consultants for the YEM Economy, can be advertised by anyone.

In addition, with the help of this project, business contacts who are interested in participating in an independent YEM marketplace can be recorded and specifically managed by each user. Such a collective collection of contacts and their order serves the above-mentioned consultants as a basis for their work.

Such projects serve the YEM Economy as a goal-oriented, organized center of action and must be brought into focus by the YEM community and all official representatives. This includes regular presentations and special training to ensure the broadest possible use and, as a result, countless possible applications for YEM.

Statutes for the YEM Foundation

As far as I understand, there are no written statutes for the YEM Foundation. I think it would be a very strong statement if every interested person could read about how democratic the structure of YEM is and that YEM Holders decide what shall happen next.

Should the next YF BID elections be announced on time?

In order to find suitable candidates for the next term of office of the Board of International Directors of the YEM Foundation, it is important that the elections are announced publicly at least 3 months in advance and promoted at closely scheduled intervals.

Vote here: <https://proorno.com/statement.php?id=19771>

Should there be a publicly viewable application page for the next BID election?

In order to give suitable candidates for a position on the Board of International Directors (BID) of the YEM Foundation a serious impression, it is necessary to provide this - very small group of people - with information that is as barrier-free as possible, and thus to motivate them to apply for this demanding and responsible position.

The (timely) publication of an official application page, on which the requirements, the application form and contact addresses are transparently visible to potential interested parties, lays the foundation for this.

Such a page could then be promoted continuously worldwide by the YEM community and potential interested parties can prepare appropriately for an election campaign.

Vote here: <https://proorno.com/statement.php?id=19772>

Holders of an office in the BID of the YF should not hold any significant other positions!

To avoid bias and conflicts of interest, holders of an office on the Board of International Directors of the YEM Foundation (BID) are not allowed to hold additional leading positions or offices in other companies, associations or foundations.

Vote here: <https://proorno.com/statement.php?id=19773>

The application of a new BID candidate must be transparent!

It is imperative to provide the YEM Foundation electorate with as transparent and comprehensive a picture as possible of the candidates standing for election. An application form for future candidates for a position on the Board of International Directors (BID) must therefore contain certain minimum requirements that an applicant must fill out. An application video, for example, is the absolute minimum standard these days. Such a procedure also protects against possible fraudsters who may only want to use their office for their own benefits.

Vote here: <https://proorno.com/statement.php?id=19774>

If in doubt, without guidance!

Wrong motives and a lack of information and training do more harm than good during a 3-year term. The installation of officers on the Board of International Directors (BID) of the YEM Foundation must therefore be carried out according to consistent requirements. Authorizing “placeholders” or “straw dummies” in this responsible position must be consistently avoided – even if no suitable candidates can currently be found.
